### DETAILED ACTION

This Office action is in response to Applicant's appeal brief filed on October 5, 2006.

PROSECUTION IS HEREBY REOPENED. All claims are allowable over the prior art of record however, claims 33-43 are directed non-statutory subject matter as discussed below.

Applicant is encouraged to contact the Examiner to discuss possible Examiner's amendments to overcome this 101 rejection.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Rupal Dharia.

***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**5. Claims 33-43 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.**

With regard to claims 33-43, these claims recite various modules that may be implemented solely in software and are thus software per se (see inter alia, Applicant's specification ¶ 31). As recited in the interim guidelines pg 53 "computer programs claimed as computer listings per se, i.e., the descriptions or expressions of the programs, are not physical 'things.' They are neither computer components nor statutory processes, as they are not 'acts' being performed" (Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" signed October 26<sup>th</sup>, 2005). No "acts" are performed because the "claimed computer programs do not define any structural and functional interrelationships between the computer program and other claimed elements of a computer which permit the computer program's functionality to be realized." Thus, claims 33-43 are directed to non-statutory subject matter. Applicant may overcome this rejection by embodying the claimed computer programs on a computer readable storage medium.

***Allowable Subject Matter***

Claims 1-43 and 45-50 are allowable in view of Applicant's arguments submitted in the appeal brief filed October 5, 2006, pages 10-14.
